

Press Release – June 7, 2010

For Immediate Release:

Centra Windows Reflects Bethesda Christian Association's Giving Nature

Surrey, BC, June 5th 2010 - Each year Centra makes a conscious effort to support local charities and organizations, which are important to them and their families. This past Saturday nineteen of Centra's dedicated employees volunteered their time and services to the Bethesda Christian Association's care home in Surrey. Bethesda has been helping individuals with disabilities and their families for over 50 years and Centra was happy to support their efforts by providing them with a healthier and brighter living environment.

Centra donated and replaced 23 windows, the front door, a patio door, and a double door. The Centra team began working at 8:30am and except for the front entry door unit, everything was completed and cleaned up before 11:30am. The Centra team is fast and efficient and eager to help. "Social responsibility is key to our corporate culture at Centra." says John Tilstra, President. "We are thrilled to be able to support those less fortunate than us and know that many will benefit from the generosity of Centra's family".

About Centra Windows

Founded in 1984 Centra has had a long term commitment to providing the highest quality products & service, improving home energy efficiency and supporting their local communities. Their dedication to environmental responsibility is shown through their recycling programs, the EcoSmart window and their knowledge of house-as-a-system technology resulting in a reduction of thousands of tonnes of greenhouse gas emissions and personal energy footprints.

Centra's high-performance window systems are an eco-Smart offering with outstanding benefits to the homeowner. The natural insulation of 100% vinyl returns immediate savings in energy bills. The same energy-efficient features that guard against temperature extremes also guard against outside noise. These practical advantages coupled with design and ease of maintenance create a solution for consumers who are concerned about energy efficiency in their homes.

Centra manufactures and installs home replacement Energy Star windows, doors and siding across most areas of British Columbia. Centra's unique approach of keeping everything in-house, from manufacturing, distributing and installing results in consistently high quality products and your worry free renovation from start to finish and beyond.
