

For Immediate Release:

Centra Windows Donates Sunshine to Nanaimo Alliance Church

Nanaimo, BC, September 3rd 2010 - Each year Centra makes a conscious effort to support local charities and organizations, which are important to them and their families. This past Friday five of Centra's dedicated employees, Dennis, Carl, Joe, Shane and Lindsay, volunteered their time and services to the Nanaimo Alliance Church. Nanaimo Alliance Church has been helping children, youth, adults and families for many years and Centra was happy to support their efforts by providing them with a healthier and brighter environment.

Centra donated and replaced 7 windows in just under three hours. The Centra team is fast and efficient and eager to help and everyone at the church was more than pleased with the finished job. "Social responsibility is key to our corporate culture at Centra", says John Tilstra, President. "We are thrilled to be able to support those less fortunate than us and know that many will benefit from the generosity of Centra's family". Dennis Breckon, one of Centra's Senior Sales Reps is a member of the Nanaimo Alliance Church and was ecstatic with the outcome of the installation. Breckon explains, "I am so proud to work for a company which holds social responsibility in such high regards. My coworkers and I were happy to donate our time and our windows and hope that the extra rays of sunshine bring happiness for many years to come".

About Centra Windows

Founded in 1984 Centra has had a long term commitment to providing the highest quality products & service, improving home energy efficiency and supporting their local communities. Their dedication to environmental responsibility is shown through their recycling programs, the ecoSmart window and their knowledge of house-as-a-system technology resulting in a reduction of thousands of tonnes of greenhouse gas emissions and personal energy footprints.

Centra's high-performance window systems are an ecoSmart offering with outstanding benefits to the homeowner. The natural insulation of 100% vinyl returns immediate savings in energy bills. The same energy-efficient features that guard against temperature extremes also guard against outside noise. These practical advantages coupled with design and ease of maintenance create a solution for consumers who are concerned about energy efficiency in their homes.

Centra manufactures and installs home replacement Energy Star windows, doors and siding across most areas of British Columbia. Centra's unique approach of keeping everything in-house, from manufacturing, distributing and installing results in consistently high quality products and your worry free renovation from start to finish and beyond.
