

Centra Glass

The glass you select can affect energy efficiency and comfort, provide greater clarity, and filter out specific kinds of light. Our experts will help you find the right glass option for your home and local climate.

The image above was taken by an FLIR thermal imaging camera and shows the difference between various low emissivity (LoE) window glass coatings when they're exposed to heat sources. The glass on the right performs best, reflecting the most heat and substantially increasing your comfort. Now that's cool!

SUPERIOR GLASS OPTIONS

What is the most common reason to upgrade your windows? The ability to boost the comfort levels in your home by reducing winter drafts, summer heat, and outdoor noise. We can add thermal protection and sound reduction through a number of means, including extra panes, offset glass thicknesses, and laminated glass. We will work with you to determine the best product for your home, factoring in climate, sound abatement, energy savings, and budget.

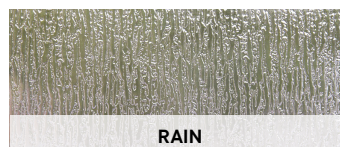

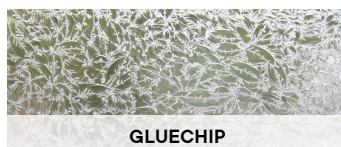

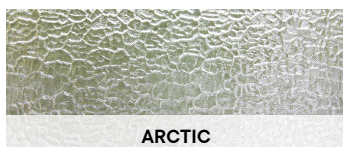

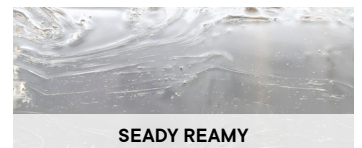

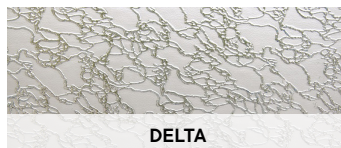

OBSCURE OPTIONS

Create a completely custom look with obscure glass. We have options to suit your needs, whatever type of privacy or style you're looking for. Obscure glass is a great solution for bathrooms, garages, or anywhere additional privacy is required.
