Why Choose Centra?

TRUSTED BY HOMEOWNERS FOR OVER 40 YEARS

100% Employee Owned

Centra is completely Employee Owned! Employee Ownership makes us different because owners truly care and always go the extra mile — and when you choose Centra, you're dealing with owners from first call to install. That's the kind of service you won't find elsewhere.

100% Local

With Centra, you're supporting a locally owned and operated business. We appreciate the role the community has played in our success, and we're constantly striving to give back by creating local jobs and supporting those in need through our charitable foundation.

BC & Alberta's Window Experts

Our Employee Owners are local experts who've been serving homeowners across Western Canada since 1984. When it comes to an investment like new windows, you want a company that has stood the test of time with a proven record for delivering on their promises.

Manufacture & Install

We handle everything in-house, from manufacturing to installation. The end result is quality products designed for maximum performance. Our manufacturers and installers are Centra Employee Owners, which means we control quality and safety standards every step of the way.

An Exceptional Warranty

Our 30-year warranty covers the glass, frame, installation, and labour, plus it's fully transferable! Most 'lifetime' warranties actually cover 10-20 or less — always ask window companies for the full details of their warranty. It's the best way to tell how trusted their products and methods are.

An Award-Winning Company

Centra is honoured to be the most awarded local window company! With Canada's Best Managed Companies, Canada's Most Admired Corporate Culture, Employer of the Year, and plenty more accolades under our belt, you know you're in good hands and working with the right team.

The Centra Family

Our registered charity Centra Cares supports communities locally and globally. Since 2015, our foundation has given Employee Owners the opportunity to give back and create a lasting impact. To date, we have fundraised and donated over \$2,000,000 for over 250 charities. Every year our Employee Owners nominate charities close to their hearts, and we support these fantastic causes through donations of funds, time, and high-performance windows and doors.

Supreme Collection

A revolutionary hybrid window offering the best of both worlds — the exceptional efficiency of vinyl, and the incredible durability and longevity of aluminum. These are top-quality, custom-made windows that offer endless curb appeal and bring a lifetime of home comfort. The Supreme Collection is available in casement, awning, bay, bow, and picture window configurations that are custom made for your home.

Classic Collection

Timeless and functional. Our Classic Collection offers quality and incredible value. These windows will provide a lifetime of security and performance, and the contemporary design is suitable for all home styles. The Classic Collection is available in sliding, bay, bow, and picture window configurations that are custom made for your home.

Modern Collection

Sleek and elegant. Our Modern Collection delivers on energy efficiency and curb appeal, while the balanced sash and flat-faced trim brings symmetry to your home. These stunning 21st century windows are a great fit for contemporary architecture. The Modern Collection is available in casement, awning, bay, bow, and picture window configurations that are custom made for your home.

Traditional Collection

Classy and sophisticated. As the name implies, our Traditional Collection is a natural fit for traditional architecture and the unbalanced sash pairs perfectly with our Classic Collection for a seamless look. These windows are highly secure and energy efficient. The Traditional Collection is available in casement, awning, bay, bow, and picture window configurations that are custom made for your home.

Products may vary by province.

representative.

Patio Doors

Make a space feel lighter and larger and take advantage of beautiful views with high-performance patio doors. Centra offers a range of energy-efficient, custom-made designs to suit any home, including Classic Patio sliders and stunning West Coast Sliders.

Exterior Doors

Create a memorable first impression with Centra's elegant, durable door systems. Choose from high-performance Entry Doors, Traditional French Doors, and European-style Cenergy French Doors — all designed for security, energy efficiency, and lasting style.

Glass Technology

Our energy-efficient windows will limit the transfer of heat through the glass, and that works both ways. You'll be warmer in the winter and cooler in the summer, and you'll save on energy bills year-round. You (and your bank balance) can thank Low Emissivity (LoE) coatings. As you'll quickly learn, investing in LoE windows is more than worth it.

Safety & Sound Reduction

Tempered and laminated glass are available. Ask your sales representative about Centra Safety Glass and options to cut down on neighbourhood noise. You deserve peace of mind at home — Centra can help you achieve it.

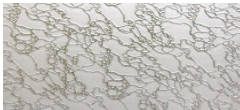

Custom Options

When it comes to windows, glass options make a significant difference. Your choice can greatly affect energy efficiency, improve clarity, reduce neighborhood noise, and even filter out specific kinds of light. You can also introduce a bit of privacy and create a custom look with obscure glass in parts of the home where clear glass isn't suitable. We have an extensive collection to choose from and our experts are the best in the business, so get Centra Windows and Install Pros on your side to guarantee you have the right glass for your home and climate.

Obscure Glass Options

Satin Etch

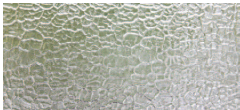

Delta

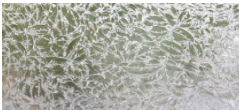

Pinhead

Seedy Reamy

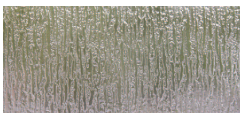

Arctic

Gluechip

Narrow Reed

Rain

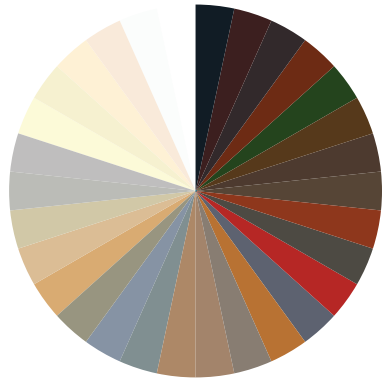

Custom Shapes

If you can dream it, we can build it. We're able to customize a window's look and operation depending on individual needs. We ensure your home is "comfort engineered" on a window-by-window basis, no matter the shape.

Colour Options

Dramatically enhance the look of your windows and doors with inspiring, customizable colour options — whether it's classic white, sleek black, or something more unique. Centra's durable paint resists fading and peeling, standing up to the elements while reflecting your style. Let your home make a statement with colours that last.

Maximum Performance

Our multi-chamber (7–10 chambers, compared to others with 2–6) heavy vinyl frames (wall thickness of 2.2 mm, versus others at 1.5–1.7 mm) provide increased strength and insulation. The additional chambers act as thermal breaks, which increase the energy efficiency of our products. The heavier vinyl frames help prevent the windows from warping, twisting, or sagging over time. When necessary, we add galvanized steel to further enhance the strength of our windows.

Live in a Multi-Family Complex?

If you live in a multifamily building and you're dealing with old windows and energy efficiency issues, Centra Windows and Install Pros are here for you. Whether it's a single unit or the entire building, our experts stand ready to help you achieve the home comfort you deserve. We have the knowledge, experience, and drive to make your project a success, and we back up our promises with an unbeatable warranty.

We're not just Window Experts — we are also the top choice when it comes to doors, exteriors, and remediation work. Our products are engineer-approved, we can deal with hazardous materials such as asbestos, and we do our own scaffolding. By opting for a one-stop shop, you greatly limit any back-and-forth with your project and get it done more quickly. We can even work while the building is occupied!

At Centra, we both manufacture and install our products — a huge bonus for multifamily homeowners. Keeping everything in-house instead of using subcontractors means there's no finger-pointing and allows us to offer our industry-leading warranty. By choosing Centra Windows and Install Pros, you're choosing a lifetime of efficiency, performance, and comfort for your complex and all its residents.

Working on a New Construction Project?

Whether it's a custom-built home or a high-rise tower, choose a window supplier who will also act as a partner. Centra Windows improves efficiency in more ways than one — our products are rigorously tested with tremendous thermal performance and fantastic U-Values, and we've also saved clients millions of dollars through our value assessment services. It's a balance no one does better than Centra Windows.

You want top quality and exceptional efficiency from an experienced company with its own research and development department, and that's exactly what Centra Windows offers. We maintain great lead times, and our involvement doesn't end after the sale — we provide on-site testing to ensure our products are performing to the high standards expected by both our clients and ourselves.

Our experts are among the most accomplished in the industry. We regularly provide design assistance to professionals on everything from glass thickness and size limitations to code issues. We review design drawings and offer creative solutions and smart ways to save. We also support architects and engineers with window interface design, replacement options, and building envelope renovations.

We have the BEST customers and here's what they have to say:

“

'I'd 100% recommend Centra to anyone I know. They're the team you want. You'll have an exceptional customer experience with an exceptional product.'

— Theresa S

"I'd recommend Centra to anybody. New windows are such a major addition to your home, and the house just looks like a million dollars now."

— Cat M

"We'd never met a bunch who cared more about what they were doing, and we didn't have one bad experience. They went above and beyond."

— Anthony P

"We're exceptionally happy with them because there's no worry for us. Centra has been a longtime manufacturer and employer in the province, and even 15, 20 years out, somebody's going to be there to help."

— Doug S

"The biggest factor for going with Centra was that they use their own installers, so we knew that we would only ever be dealing with one company."

— Sharon P

”

FAQ

Q: Are your quotes free?

A: Absolutely! Our quotes are zero cost, zero obligation — no strings attached.

Q: How long does a consultation typically last?

A: Our window experts want to provide a customized, educational experience and address any questions you have. Our consultations can last anywhere between 1-2 hours depending on your project's scope.

Q: How can I prepare for the consultation?

A: Our experts take care of the majority of the work, all you need to do is ensure the project area is easily accessible for our sales estimators so they can take measurements. Moving furniture and blinds is a great help. We'll do the rest!

Q: What size projects do you do?

A: The size of your project doesn't matter — we're here for you! We can handle anything from a single window or door, to full house packages, to renovations on multi-family buildings — including high-rises! We can also provide our windows on a supply-only basis for both new builds and upgrades.

Q: Do you offer a warranty?

A: Our industry-leading 30-year warranty is one of the many great benefits that makes Centra so special! Since we don't use third-party contractors we're able to offer a top-of-the-line, fully transferable warranty to all customers. There's no finger-pointing, and you know exactly who to call if you need help!

Q: Do you offer payment options?

A: We sure do! Ask your Centra sales rep about a payment plan that will work for you.
